Module BM03: Problem Management

Group exercise

In this exercise, individuals/teams must create their own, brand new, problem-solving activity. As the participants arrive, you announce that, rather than spending an hour on a problem-solving team building activity, they must design an original one of their own.

Divide participants into teams and tell them that they have to create a new problem-solving team building activity that will work well in their organisation. The activity must not be one that they have already participated in or heard of.

After an hour, each team must present their new activity to everyone else, and outline its key benefits.
